THE SERIAL NUMBERS OF YOUR GAME ARE LOCATED ON THE PRINTED
CIRCUIT BOARDS AS SHOWN BELOW. PLEASE HAVE THESE SERIAL
NUMBERS AVAILABLE WHEN CONTACTING US FOR SERVICE INFORMATION.
PLEASE RECORD THE PC BOARD SERIAL NUMBERS HERE:

> 1) LOWER PC BOARD - SOLDER SIDE:
>   AAMA SERIAL NUMBER: _____
>
> 2) LOWER PC BOARD - COMPONENT SIDE:
>   CAPCOM SERIAL NUMBER_____

TABLE OF CONTENTS

CAUTION

Please read the following instructions to keep the PC boards in good condition:

◆ **Do not drop or bump the boards.**
◆ **Do not spill any liquids on the boards.**

DISASSEMBLING THE BOARDS OR REMOVING STICKERS MAY CAUSE THE TERMINATION OF YOUR REPAIR WARRANTY.

LIMITED PRODUCT WARRANTY
(APPLIES TO DOMESTIC SALES ONLY)

CAPCOM® COIN-OP, INC. (Seller), warrants only to the initial purchaser of its products, that the items listed below are free from defects in material and workmanship under normal use and service for the warranty periods specified:

A.	Printed Circuit Boards:	Ninety (90) Days
B.	Electronic and Mechanical Components:	Ninety (90) Days

No other part of Seller's products are warranted.

Warranty periods are effective from the initial date of shipment from seller to its authorized distributors.

Seller's sole liability shall be, at its option, to repair or replace products which are returned to Seller during the warranty periods specified, provided:

A.   Seller is notified promptly upon discovery by buyer that stated products are defective;

B.   Such products are properly packaged and then returned, prepaid to Seller's designated plant.

This warranty does not apply to any parts damaged during shipment or handling, or due to improper installation or usage, or alteration. In no event shall Seller be liable for any anticipated profits, loss of profits, loss of use, incidental or consequential damages or any other losses incurred by the customer in connection with the purchase of a CAPCOM® COIN-OP, INC. product.

WARRANTY DISCLAIMER

EXCEPT AS SPECIFICALLY PROVIDED IN A WRITTEN CONTRACT BETWEEN SELLER AND PURCHASER, THERE ARE NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

IMPORTANT NOTICE

THIS SHIPMENT HAS BEEN CAREFULLY INSPECTED AND PROPERLY PACKAGED BEFORE LEAVING THE FACTORY. WE CANNOT ASSUME RESPONSIBILITY FOR BREAKAGE THAT MAY OCCUR DURING TRANSPORTATION OF THE GAME. IF THIS GAME IS DAMAGED UPON RECEIPT FROM THE CARRIER, IMMEDIATELY NOTIFY THE CARRIER AND FILE A DAMAGE REPORT.

KIT INSPECTION

Check that all of the following parts have been shipped with your kit. If any parts are missing, contact your distributor immediately.

SFE1000 KIT PARTS LIST

PART NO.	DESCRIPTION	QTY
SFE1400	Assy, PCB, PSX System, Street Fighter EX	1
13-0154	Standoff w/Screw, PCB Mounting	4
SC00104-05	Screw, Wood	4

KIT INSTALLATION

⚠ WARNING:

MAKE SURE ELECTRICAL POWER TO THE GAME IS OFF BEFORE STARTING THE KIT INSTALLATION.

PREPARATION

1.   Disconnect and remove the old printed circuit board(s) from the cabinet.

2.   Remove or open the control panel, and disconnect and remove the buttons and joystick(s) from the control panel.

3.   Remove any covering from the control panel overlay, and then remove the control panel overlay.

4.   Place the Drill Hole template over the control panel to determine where any new holes should go. Center punch any needed new holes on the control panel.

5.   Cut out the new holes using a 1-3/16" hole saw.

6.   If there is an additional control panel cover, Figure 1 (such as plastic or lexan) that will be utilized, cut any additional holes using the same template.
*Cover is not included in the kit.

7.   Plug up unused holes with a wood dowel (1-1/8" diameter) and sand any rough edges.

INSTALLATION

Marquee Installation

8.   Remove the marquee plexi glass, marquee overlay, and the cabinet graphics.

9.   Install the new marquee and replace the plexi glass. Clear plexi glass is included in "Full" kit.

Control Panel Overlay Installation (See Figure 1)

10.   The control panel overlay in the kit is oversized to accommodate most control panel sizes. Center the overlay on the control panel, leaving some excess material at the edges.

11.   Remove the protective backing from the overlay and press it down on the control panel, keeping it properly aligned. Press it down firmly, smooth out any bubbles, and press it over the edges.

12.   Trim any excess from the overlay. Place the drill hole template on top of the overlay, aligning it with the joystick holes. Pierce through the overlay at each control panel hole. Then, cut away overlay material covering the joystick and button holes. Remove the template and clean off the overlay.

13.   Peel off the backings of the 6-button and joystick decals, align over the control panel holes, and press in place on the overlay (refer to the drill hole template for proper placement). Using a knife, trim material from the center hole of the joystick decal.

14.   Install the control panel cover, Figure.1. (if required).

Figure 1: Overlay Installation

Reassembly of Components

15.   Notice that there are two white buttons. See Figure 2. The WHITE buttons are START buttons. Install the PLAYER ONE button on the top left-hand side of the control panel, and the PLAYER TWO button on the top right-side of the control panel.

Figure 2: Start Buttons

Red Green Blue   Red Green Blue

Buttons

Retaining
Rings

Switches

V80900

Figure 3: Control Panel Buttons and Switches

16. Install all buttons and retaining rings on the control panel as shown in Figure 3. Install two RED buttons to the immediate right of each joystick, install two GREEN buttons to the right of the red ones, and install two BLUE buttons to the right of the green ones.

17. Install the switches on the buttons as shown in Figure 3. Orient the switches so that when a button is pressed, the red contact on the switch is depressed.

18. Install the joysticks on the control panel as shown in Figure 4.

V180700

Figure 4: Joystick Installation

CABINET DECAL INSTALLATION

19. Remove monitor glass and install monitor card

20. Peel-off the backing to the instruction decals and place on both the top and bottom of the monitor card. (See Figure 5). Also, apply the cabinet decals to both sides of the cabinet.

CONTROL PANEL WIRING

NOTE: All switch wires used in this game must be wired to the normally-open connection on the switches. Each switch requires a ground wire on the common connector and the appropriate control or switch wire on the normally-open connector of the switch.

21. Reconnect the existing JAMMA connectors to the control panel according to the chart in Table 1.

22. Connect the Player 1 and the Player 2 KICK buttons to the auxiliary cable harness as shown in Figure 6. Make the connections according to the chart in Table 2.

3

TEST/VOLUME BRACKET WIRING

23.   An optional Test/Volume bracket (see Figure 7) is available through your local CAPCOM distributor (Part number 03-0050). Your cabinet may already contain this bracket. When installing, the bracket should be mounted inside the coin door and on top of the cash box for easy access.

NOTE: Only the Test switch is used for this game; the Volume Up/Down switches are disabled.
Volume adjustments must be made through the volume control knob located on the PC board.

Figure 7: Test Bracket

Wiring of the Test Bracket requires connections to the main JAMMA harness as shown in Table 3:

LEAD WIRE COLOR	SWITCH FUNCTION	CONNECTS TO
YELLOW	VOLUME-UP	NO CONNECTION
BLACK	VOLUME-DOWN	NO CONNECTION
GREEN	COMMON	NO CONNECTION
BROWN	TEST	JAMMA "15"
BLACK	GROUND	JAMMA "A" or "B" or "e" or "f" or "1" or "2" or "27" or "28"

Table 3: Test Bracket Wiring Chart

SPEAKER WIRING

24a. If you are converting a cabinet that is not equipped with CAPCOM® Q-SOUND, the leads from the speaker harness (supplied with this kit) **must be wired to the cabinet speakers according to the Table 4.**

SPEAKER (TERMINAL)	WIRE COLOR
LEFT (+)	WHITE
LEFT (-)	GRAY
RIGHT (+)	BROWN
RIGHT (+)	ORANGE

Table 4: Speaker Wiring Chart

24b. If you are converting a cabinet that is equipped with CAPCOM® Q-SOUND, you may elect to wire directly to the cabinet speaker terminals, as shown above, or you can obtain the same result by performing the following modification (see Figure 8):

i)   Disconnect the speaker harness connector from the Q-SOUND board at location CB8.

NOTE: EXTERNAL Q-SOUND POWER AMPLIFIER MUST DISCONECTED WITH THIS PSX SYSTEM PCB.

ii) Install a 4-pin, 0.156 inch diameter header connector (not supplied with this kit; purchase locally) onto the speaker harness connector.

iii) Insert each wire lead from the supplied speaker harness to each corresponding pin from a 4-pin, 0.156 inch diameter female connector (not supplied with this kit; purchase locally).

iv) Push the female connector and the header connector pins together.

v) Your cabinet is now equipped to receive stereo sound from the PC board.

Figure 8: Q-SOUND Modification

PC BOARD INSTALLATION

25. Install the four (4) mounting standoffs to the underside of the PC board by securing with the supplied machine screws. Then, fasten the PC board standoffs to the control panel shelf with wood screws, as shown in Figure 11.

Figure 9: PC Board Mounting

PC BOARD WIRING CONNECTIONS AND ADJUSTMENTS

26. Connect the JAMMA harness connector to the edge connector located on the bottom PC board (see Figure 10).

WARNING

Improper installation of the JAMMA harness connector to the PC board connector will cause damage to the PC board.

27. Attach the auxiliary cable connector to the top PC board at location CN2 (see Figure 10).

28. Attach the speaker harness connector to the PC board at location CN504 (see Figure 10).

29. Check that the mode switch, on the lower PC board, is set to "STEREO" (see Figure 10).

30. Check that all 4 positions of the DIP switch are set to OFF (see Figure 10).

31. Power-up the game and adjust the speaker volume by turning the Volume Control knob clockwise to increase volume, or counterclockwise to decrease volume (see Figure 10).

32. Set all operator adjusTable options by pressing the **TEST** switch. Follow the instructions under the *TEST MENU* section of this manual.

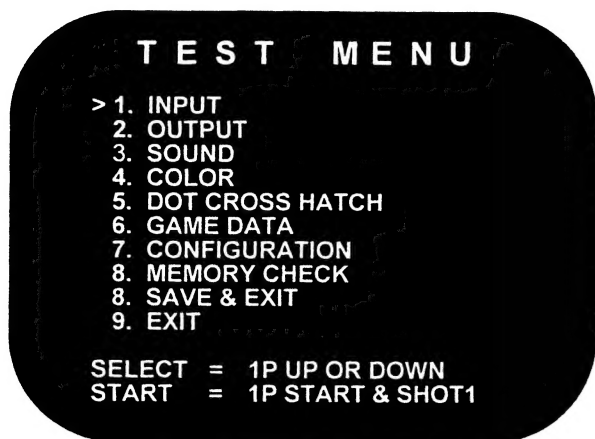

Figure 10: PC Board Wiring Connections & Adjustments

TEST MENU

The test menu allows you to test various functions of the game and configure settings used in the game. These items include input devices such as joysticks, buttons and coin mechs, output devices such as monitor, speakers and meters. Through the Test Menu you can also access the Configuration Menu, where you can change the settings of the game.

```
  T E S T       M E N U

 > 1. INPUT
   2. OUTPUT
   3. SOUND
   4. COLOR
   5. DOT CROSS HATCH
   6. GAME DATA
   7. CONFIGURATION
   8. MEMORY CHECK
   8. SAVE & EXIT
   9. EXIT

 SELECT = 1P UP OR DOWN
 START  = 1P START & SHOT1
```

1.   ACCESSING THE TEST MENU

•   **For a CAPCOM® cabinet or a converted cabinet with a test switch:**
Make sure the game is on. Open the coin door, find the location of the test switch, and press "Test". The screen shown left will appear on the monitor:

•   **For a cabinet without a test switch:**
You need install "Test Switch". Refer Page 5. for details.

2.   HOW TO SELECT AN ITEM
• Use the *PLAYER 1 JOYSTICK* to move the arrow in front of the desired item and press the *PLAYER 1 PUNCH LIGHT* button.
•   To return to the test menu, push the *PLAYER 1 START* and *PLAYER 2 START* buttons simultaneously.

3.   CLOSING THE TEST MENU
To close the Test Menu, highlight "**9. EXIT**" and push the *PLAYER 1 PUNCH LIGHT* button.
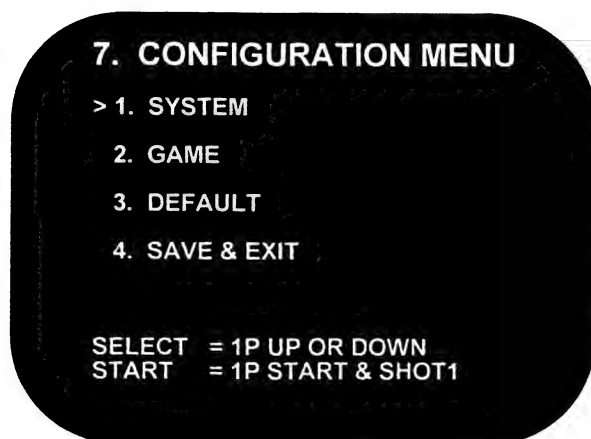

Player 1 Joystick   Player 1 Start

V1601

Player 1 Shot 1   Player 1 Shot 2
(Punch Light)   (Punch Middle)

•   The test menu will always appear on the screen:
   a) After you exit the "**7. CONFIGURATION MENU**" and
   b) After the memory is tested from the menu, "**8. MEMORY CHECK**".

4. TEST MENU ITEM DESCRIPTIONS

INPUT	Used to test all the input switches, such as joysticks and buttons. The "0" changes to a "1" as the button is pushed or joystick is moved. Check connections and switches in case the "0" doesn't change to a "1" when depressed or moved.
OUTPUT	Used to test the coin meter and the coin lock.
SOUND	Select a code of **SOUND** or **VOICE** with the *PLAYER 1 JOYSTICK*. Push the *PLAYER 1 PUNCH LIGHT* button to hear the sound of the selected code.
COLOR	Shows color bars of red, green, blue, and white. Adjust **RGB** and brightness to obtain the optimum color balance and solid black background.
DOT CROSS HATCH	Used to test the screen size, focus and distortion.
GAME DATA	Coin meter and playtime information will be displayed.
CONFIGURATION	Used to change the game play settings. Refer to the **CONFIGURATION MENU** section.
MEMORY CHECK	Used to test memory. "**OK**" appears when each block of memory passes test, "**NG**" appears in case of malfunction. If "**NG**" appears, repeat the memory test and wait for the "**OK**" message. Contact your distributor if "**NG**" still appears.
EXIT	Select this item and push the *PLAYER 1 PUNCH LIGHT* button to return to game play mode.

CONFIGURATION MENU

The Configuration Menu is used to change various game settings such as level difficulty, credits, sound configuration, etc. These settings are stored in memory on the PCB rather than DIP switches. The Configuration Menu is divided into 2 sections. In the **SYSTEM** section, you can change credits, sound, and coin door configurations. In the **GAME** section, you can change the play difficulty level and duration of the game.

```
7. CONFIGURATION MENU

> 1. SYSTEM
  2. GAME
  3. DEFAULT
  4. SAVE & EXIT

SELECT  = 1P UP OR DOWN
START   = 1P START & SHOT1
```

1. ACCESSING THE CONFIGURATION MENU

• From the TEST MENU, move the arrow to "7. **CONFIGURATION**" and push the *PLAYER 1 PUNCH LIGHT* button. The screen below will be displayed. A description of each option is explained in the Table below.

SYSTEM	Select this item to change settings for credits, monitor flip, sound and coin door configurations.
GAME	Select this item to change difficulty level, damage level, time count speed, maximum number of rounds and event type.
DEFAULT	Use this item to restore configuration settings to the original factory values. Press the *PLAYER 1 START* and *PLAYER 1 PUNCH LIGHT* buttons at the same time to select this option.
SAVE & EXIT	Use this to save new configuration settings and exit to the Test Menu. The message "SAVING NEW CONFIGURATION IN EEPROM" will appear while the new settings are being saved. **DO NOT** turn power off to the game until "SAVING" is complete and the Test Menu reappears.

SYSTEM CONFIGURATION

7-1. SYSTEM CONFIGURATION

```
> 1. COIN MODE        2 COINS 1CREDIT
  2. CHUTE TYPE       2 CHUTES SINGLE
  3. CONTINUE         ON
  4. DEMO SOUND       ON
  5. SOUND MODE       MONAURAL
  6. EXIT
